

SOLANA TRADING TERMINAL

BRAND KIT
VERSION 1.0
SEPTEMBER 2026

TRAG Brand Kit

Logo, dimensional mark, typography, colour and usage rules — everything needed to apply the identity across product, social and print.

DESIGNED & DELIVERED BY

IDÆVIA

DESIGNED BY IDÆVIA

01 — THE IDEA

Trag means trace.

Every trade leaves one. The identity is built on that single idea: a mark that already looks like it is moving, a palette with exactly one signal colour, and numbers always set in mono so a rate is never mistaken for prose.

Fast before pretty

Nothing decorative competes with a number. Ornament is removed, not added.

One signal

Lime marks action and gain. Everywhere else the interface stays neutral.

Built for the dark

The primary surface is near-black. Light application exists, but it is the exception.

Legible at 16 px

Two strokes on a plate. The mark survives a tab strip and a stage screen alike. DESIGNED BY IDÆVIA

**Cheapest way to trade
Solana tokens.**

02 — CONSTRUCTION

Two strokes on a squircle.

The plate is a 100-unit squircle with corner radius 31. The crossbar is 70 × 19 units, fully rounded. The stem is 18 × 56, hinged at the bar and leaning 15° forward. The gradient runs 145° and never changes angle.

GEOMETRY • 100 u PLATE

plate	100 × 100, r31
bar	70 × 19, r9.5 @ y22
stem	18 × 56, r9 @ x41 y24
lean	15° about (50, 24)

inset 15 u left and right
grad 145°, #E9FF8F →
#B4E823

DESIGNED BY IDÆVIA

Minimum size 16 px. Below 24 px drop the gradient to flat lime – the ramp muddies at small sizes.

03 — VARIANTS

Four plates, one geometry.

Primary is the default everywhere. Inverse is for lime-heavy surfaces, mono for print and single-colour partners, circular for token and social avatars.

PRIMARY • GRADIENT

INVERSE

MONO • LIGHT BACKGROUND

TOKEN AVATAR

04 — DIMENSIONAL MARK

The 3D build.

Extruded by one crossbar depth, faces stepping from lit face to shadow edge. Matte — no glass, no bloom, no rim light. App splash, hero art and token cards only; never in navigation and never as a favicon.

05 — WORDMARK & LOCKUPS

TRAG, set tight.

Space Grotesk Bold, caps, tracked -5%. Squared terminals match the rounded-rect logic of the plate. The wordmark stays one colour; the plate carries the lime.

CLEARSPACE — HALF A PLATE ON ALL SIDES

DESIGNED BY IDÆVIA

06 — MISUSE

Six things never to do.

The mark is two rounded strokes at fixed proportions. If a placement needs it altered, change the placement.

✗ **Stand the stem upright**

The 15° lean is the whole idea.
Vertical reads as a generic T.

✗ **Square the plate corners**

Corner radius is fixed at 31 % of
the plate width.

✗ **Add glow, stroke or
shadow**

The plate sits flat on the
surface. Depth only in the
3D build.

✗ **Colour the wordmark lime**

Lime belongs to the plate, to
actions and to gains.

✗ **Place it on photography**

Always a solid ground: black,
panel or paper.

✗ **Stretch or re-space**

Scale proportionally. Never
condense the wordmark to fit.

DESIGNED BY IDÆVIA

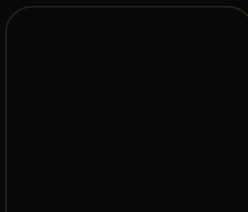

07 — COLOUR

One signal, one ground.

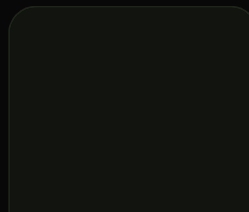

If it is not a button, a live value or the plate, it stays neutral. Green, red and amber appear inside data only — never in layout.
